Best Practice II-

**MOVING TOWARDS EFFECTIVE PAPERLESS
OFFICE**

Introduction

Hans Raj Mahila Maha Vidyalaya, located in Jalandhar, has consistently led the way in adopting innovative technologies that significantly contribute to the sustainability of our planet. While many institutions rely on traditional paper-based administrative systems, our institution has proactively embraced technology to not only improve efficiency but also to reduce our environmental footprint. Recognizing the detrimental effects of paper usage on deforestation and climate change, H MV has embarked on a journey to gradually minimize paper consumption by transitioning from manual paperwork to electronic documentation wherever feasible.

In line with our commitment to combat climate change, the decision to reduce paper usage was proposed during an IQAC meeting and subsequently endorsed by its members. To facilitate this transition, we devised a phased approach, recognizing the challenges involved in shifting from traditional manual processes to electronic formats. Through systematic training and implementation, we progressively replaced paper-based records with digital content, ensuring that our staff members were equipped with the necessary skills to adapt to this new paradigm.

Objectives

- Improve office efficiency and productivity
- Transition towards a paperless office environment to conserve paper resources
- Replace traditional paper files with electronic counterparts for enhanced storage efficiency and mobility
- Align with global standards of technological advancement in educational institutions
- Enhance information security and accessibility through digital platforms
- Foster seamless communication and collaboration among staff members and stakeholders
- Reduce expenses associated with printing and paper consumption
- Cultivate environmental consciousness among students by demonstrating sustainable practices through paper reduction initiatives.

THE PRACTICE:

PHASES OF SHIFTING FROM PAPER TO e-CONTENT

Welcome To HMV Digital Database of Trees and Plants

Hans Raj Mahila Maha Vidyalaya, Jalandhar is a premier institution of North India, providing value-based, employment-oriented quality education to women. The college functions under the DAV College Managing Committee which is the largest Non-Govt. Organization, entirely dedicated to the cause of education. By adhering to the principles of Arya Samaj, DAV College Managing Committee constantly works for social causes like building up an educated society, ensuring women emancipation, imbuing values and ethics. It is successfully running more than 700 institutions, is spread over the entire nation and some foreign countries as well.

The college was established in the year 1927 at Lahore. Mahatma Hans Raj ji, a very dedicated and selfless worker of DAV Movement, laid the foundation of this institution in Lahore in 1927 with the noble mission of educating the girls. During the struggle of Independence, the students of Hans Raj Mahila Maha Vidyalaya actively participated. It was shifted and re-established at Jalandhar in 1949 after partition. Dr. Sarvagopal Radhakrishnan, himself an enlightened soul, the then Vice President of India inaugurated the present core block of college on 7th Nov., 1959.

At present, this is one of the oldest institutions established by DAV College Managing Committee, operating under the supervision and guidance of a great visionary leader Dr. Sh. Poonam Suri, President, DAVCMC, New Delhi. This College has the unique distinction of having been re-accredited with grade A scoring 3.83 (Highest score in India amongst Women Colleges) out of 4 in NAAC accreditation. The college is also recognized by UGC as a "College of Excellence." The college also has status of Star College conferred by Government of India.

80	Fiji Fan Palm	<i>Pritchardia chinensis</i>	Arecaceae	The Fiji Fan Palm tree, is one of the world's most beautiful fan palms. It is an ornamental plant that is great for indoors or outdoors. Unlike most tropical palms with long-stalked inflorescences that droop downwards, the Fiji Fan Palm has its gorgeous flower clusters on short stalks that are somewhat upright and prominently displayed among the leafstalks. It appears to be a free-flowering palm that blooms profusely in continuous succession. This species is particularly tolerant of salty soils, making it an excellent choice for planting along the coasts in the tropics	show image
